

AIM Module #I - ARCH P-7123
2023-2024

Analysis, Systems & Composition

Denis Derycke (Teacher/Coordinator)
Michel Lefèvre (Teacher)
Julien Rippinger (Invited lecturer)
Uri Wegman (Invited lecturer)

L'anglais est la langue d'enseignement principale.

Discussions en anglais avec les non-francophones et discussions en français possible avec les francophones.

-

La plupart des références et les conférences seront en anglais, de même que les jurys intermédiaires et le jury final.

-

Travail en binôme.

ALICE

Laboratoire d'informatique pour
l'image et la conception en
architecture

-

Graphic Algorithm &
Projection shifts

Graphic Algorithm

Algorithm: a set of instruction that accomplishes a specific task.

Input

Procedure

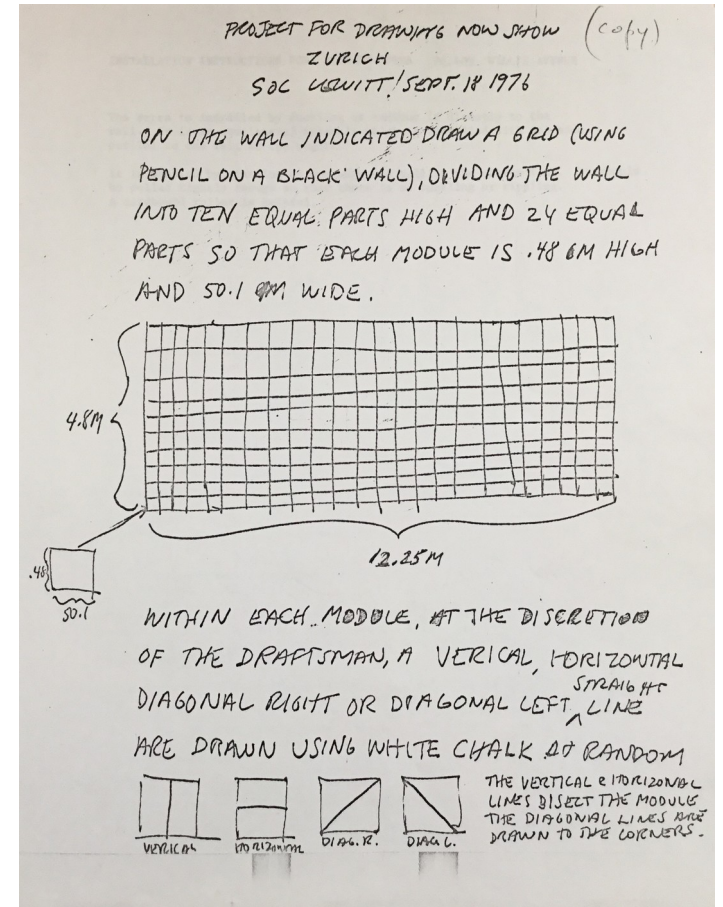

Output

Algorithm designed art:
Sol Lewitt - Wall Drawings

Sol Lewitt, Wall Drawing 769

(The instructions are not corresponding to the drawing)

Algorithm designed literature:

OuLiPo = **O**Uvroid de **L**ittérature **P**otentielle

François Le Lionnais, Georges Perec, Raymond Queneau,...

Algorithm designed music:
Terry Riley (1935) : In C (1966)

The image displays the musical score for Terry Riley's 'In C' (1966), which is a minimalist piece in C major. The score is presented in a single staff with 53 numbered measures. The notation is minimalist, focusing on rhythmic patterns and melodic fragments. Measures 1-5 show simple rhythmic patterns. Measures 6-9 introduce longer, more complex rhythmic structures. Measures 10-14 continue with rhythmic variations. Measures 15-20 show more complex rhythmic patterns. Measures 21-24 feature a series of rhythmic patterns. Measures 25-28 show a series of rhythmic patterns. Measures 29-34 show a series of rhythmic patterns. Measure 35 is a long, complex rhythmic pattern. Measures 36-40 show a series of rhythmic patterns. Measures 41-45 show a series of rhythmic patterns. Measures 46-48 show a series of rhythmic patterns. Measures 49-53 show a series of rhythmic patterns.

Figure 1.1. Score of *In C* (copyright Terry Riley, 1964).

Algorithm designed architecture:
Peter Eisenman's Houses of Cards (1967-1976)

House I - 1967

House II - 1970

House III - 1971

House IV - 1971

House V - 1972

House VI - 1976

Algorithm designed architecture:
Peter Eisenman's Houses II (1970)

House II - 18 diagrams, Peter Eisenman, 1972.

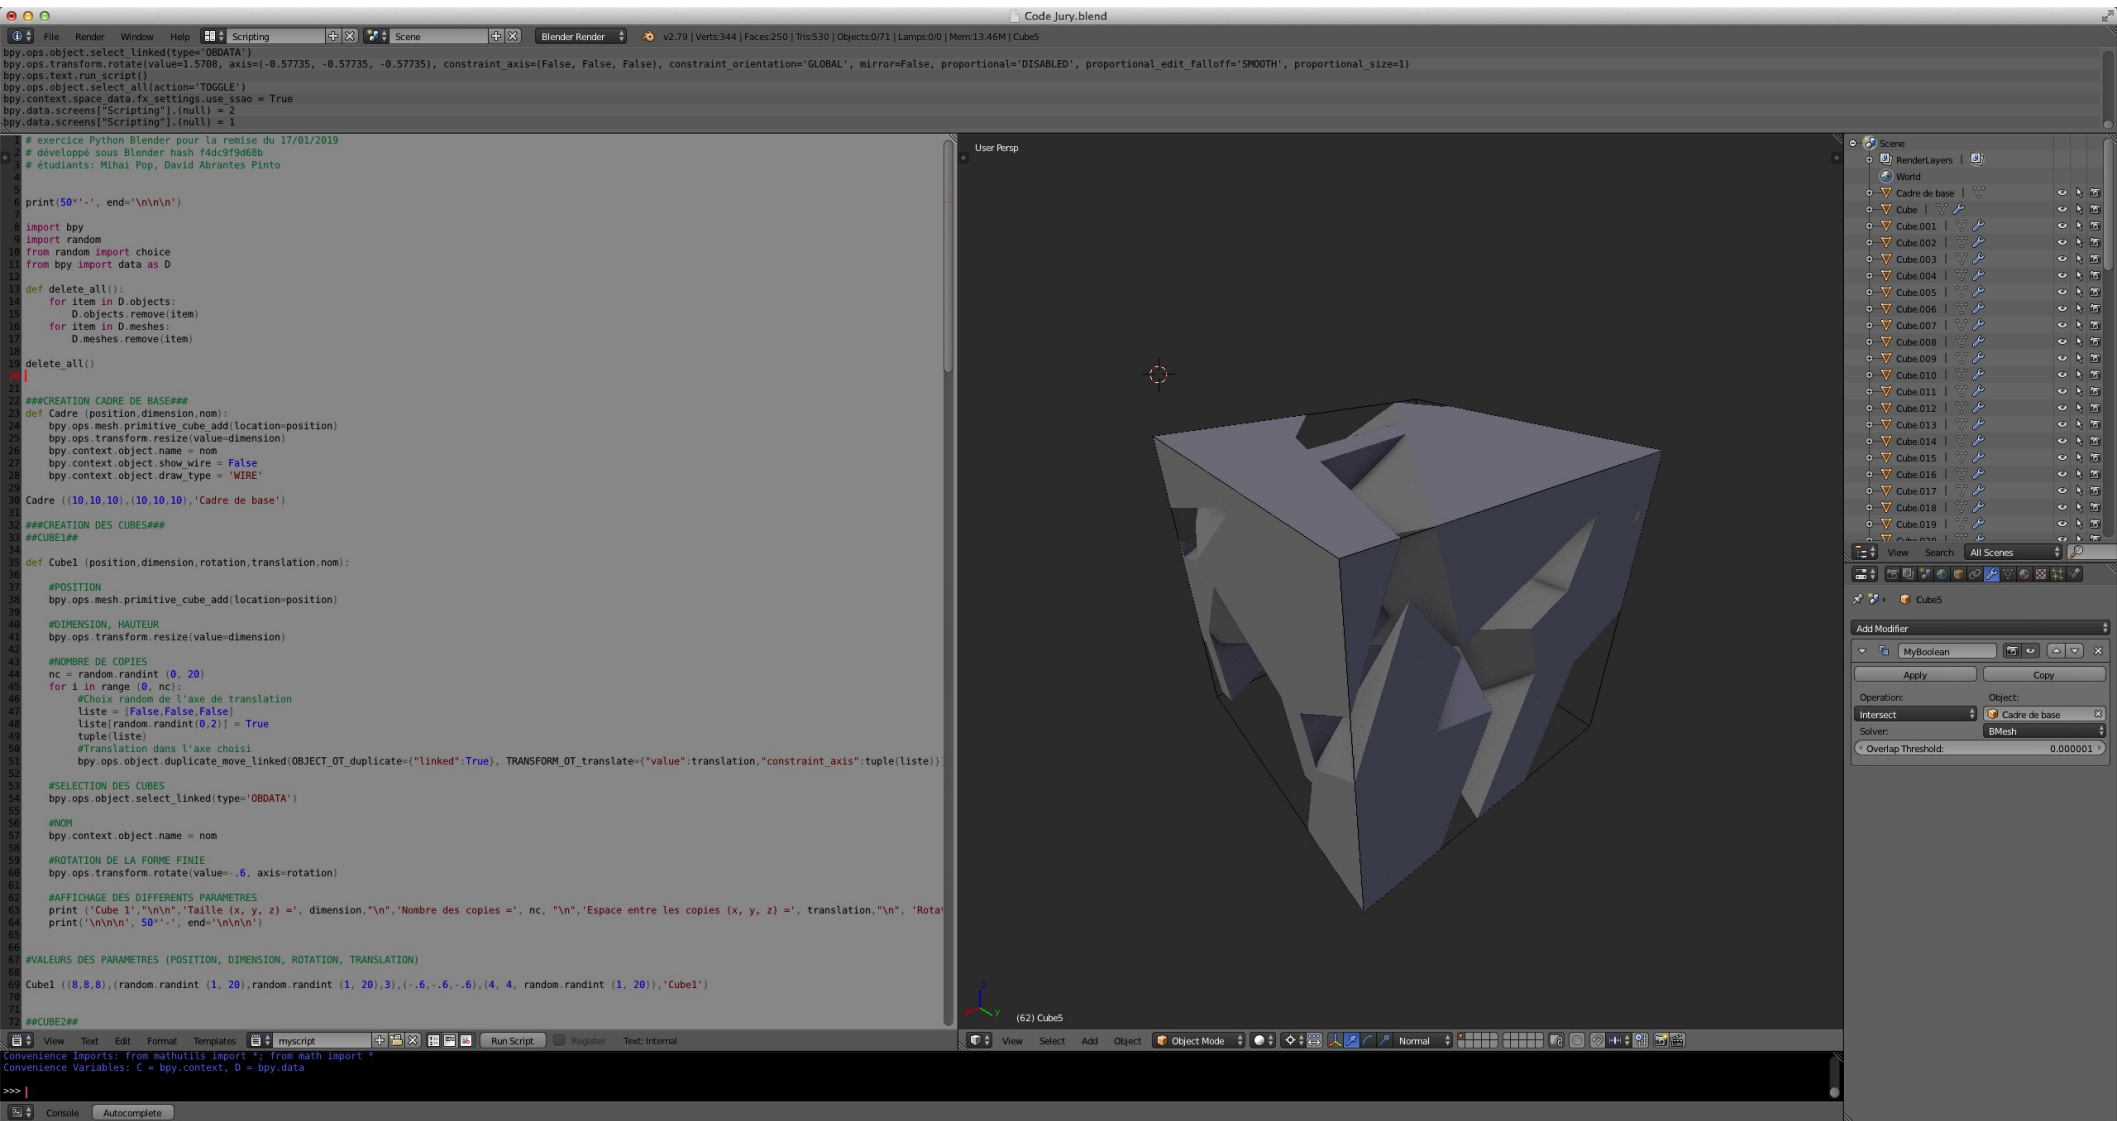

From

an object oriented design

to

a process oriented design

- to challenge the notion of "Parti architectural"
- to challenge function-oriented design
- to generate unexpected results
- to open up the field of research
- autonomous and consistent formal language

Analysis & architectural rendition of John Cage's Variation II (1961), David Abrantes Pinto & Mihai Pop, 2018.

Analysis & rendition of John Cage's Variation II (1961), David Abrantes Pinto & Mihai Pop, 2018.

Analysis & architectural rendition of John Cage's Variation II (1961), David Abrantes Pinto & Mihai Pop, 2018.

Peter Eisenman Houses IV (1972)

Explicit projection shift

Explicit projection shift

Analog & digital means

- Orthographic projections
- Multiple sections (CAT Scan)
- Axonometric projections
- Perspective (geometric construction)
- Multiple points of view perspectives
- Drafting
- Free hand drawing
- 3D printing
- Laser cutting
- Coding
- Plotter
- ALICE lab plotter
- 3D modeling
- 3D rendering
- Computer animation
- Real time 3D
- Crafting & model making

Analysis, Systems & Composition

Graphic algorithm & Projection shifts

Outcomes:

A graphic algorithm designed by using
projection shifts

-

3-5 instances of various graphic natures,
all generated by that system

-

"Irrational thoughts should be followed absolutely and
logically"

Objectives

- architectural composition without context
- rules and systems as a method of composition
- graphic representation
- thinking through making
- drawing and crafting

Hands-on, intuitive & practical

but

Rooted in history & theory
