Architecture is a tool to improve lives

For Anna Heringer, architecture is a tool to improve lives. As an architect and honorary professor of the UNESCO Chair of Earthen Architecture, Building Cultures, and Sustainable Development, she is focusing on the use of natural building materials. She is the founder and principal of Anna Heringer architects, based in Laufen, Germany, and is the recipient of the Aga Khan Award for Architecture and the Global Award for Sustainable Architecture. Anna Heringer has been actively involved in development cooperation in Bangladesh since 1997 and has completed additional projects in Asia, Africa, and Europe. She lectures worldwide and has been a visiting professor at various universities, including Stuttgart, Linz, Vienna, ETH Zürich, and TU Munich.
