

The background image is a digital rendering of a futuristic city. On the left, a large, rugged, brown rock formation with some cave-like openings dominates the foreground. The city itself is built on a series of terraced, grey stone-like platforms that descend into the distance. Numerous thin, golden, curved lines, resembling orbits or paths, arc across the sky and connect different levels of the city. The sky is a deep blue with scattered white clouds. The overall aesthetic is one of advanced urban planning and architectural imagination.

Urbanisme Flottant / Oser penser la ville sans rue !
Floating Urbanism / How dare to think the city without streets !

The Challenge

Comment re-penser la manière dont nous concevons nos déplacements sur des villes existantes construites sans rue ?

How to re-think the way we design our travel in existing cities built without streets ?
