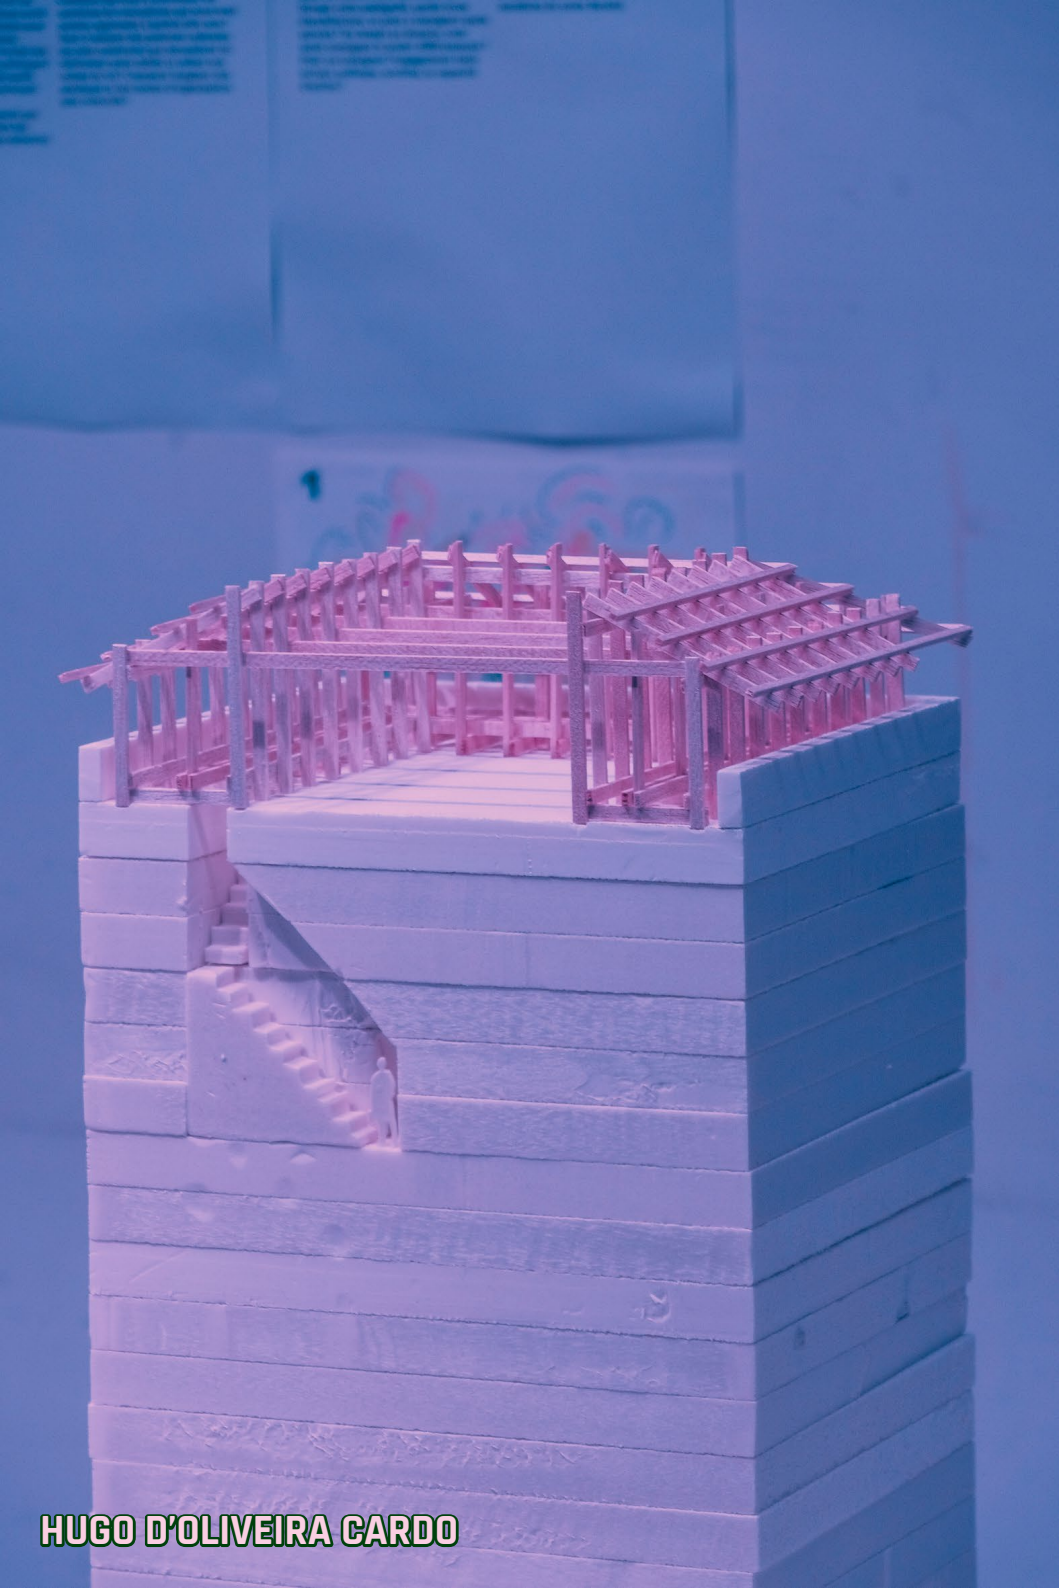
RÀN

peachlab_SIP.24_faculté d'architecture la cambre-horta_Bruxelles_RÀN



HUGO D'OLIVEIRA CARDO

RAN est un exercice de fabrication d'architecture pour l'architecture, dans lequel l'étudiant est amené à développer un espace de fascination. Le projet invite les étudiants à réinterpréter ou développer de nouvelles typologies architecturales dans la ville en manipulant ses strates, ses souvenirs, ses désirs spatiaux, en vue de créer une spatialité Autre. L'exercice sera sensible à des sujets tels que l'architectonique, la géométrie, la proportion ou la hiérarchie de composition.
